

Chapter 6 - Trial Balance And Rectification Of Errors

Question:1

State the meaning of a Trial Balance?

Solution:

Trial Balance is a statement prepared with debit and credit balances of all accounts in ledger, to verify the arithmetical accuracy of the accounts. It is prepared after balancing all the accounts of ledger. There are two columns in a Trial Balance: debit and credit. While debit side includes all the debit balances, credit side includes all the credit balances of the accounts. It also helps in preparing financial statements, as it is a summarise version of the ledger. It is generally prepared on monthly or yearly basis.

Question:2

Give two examples of errors of principle?

Solution:

'Errors of principle' refer to those errors that are committed when recording of transactions is done against the accounting principle. Below given are the examples of error of principle

1. Wages paid for construction of building debited to Wages Account

In this transaction, wages paid for the construction of building is a capital expenditure and accordingly building account should have been debited. However, in this case, it is treated as revenue expenditure and is debited to Wages Account. This error violates the accounting principle.

2. Amount spent on repair of machinery debited to Machinery Account

In this transaction, amount of repair is a revenue expenditure and **not** a capital expenditure. It should have been debited as 'Repairs', but was wrongly debited to the Machinery Account.

Question:3

Give two examples of errors of commission?

Solution:

Errors of Commission refer to those errors that are committed when transactions are recorded with wrong amounts; wrong balancing or wrong posting and/or wrong carrying forwarding is done. Below given are the examples of error of commission.

1. Goods purchased worth Rs 20,000 on credit are recorded in the Purchases Book as Rs 10,000.

This transaction should have been recorded in the Purchases Book with an amount of Rs 20,000; however, it was recorded as Rs 10,000. This is an error due to wrong recording of amount.

2. Total of Sales Book is carried forward as Rs 5,000 instead of Rs 500.

In this case, wrong amount is carried forwarded from one accounting period to another or from an end of one page to the beginning of another page. This is referred to as an error of carrying forward.

Question:4

What are the methods of preparing trial balance?

Solution:

Below are diagrammatically explained methods to prepare Trial Balance.

Let us understand these methods of preparing Trial Balance with the help of an abstract account of Mr. A.

Mr. A's Account**Dr.****Cr.**

2011		2011	
Apr.1 Balance b/d	50,000	Apr.7 Cash	30,000
Apr.3 Sales 20,000		Apr.8 Sales Return	20,000
Apr.10 Sales 40,000		Apr.16 Bank	50,000
		Apr.30 Balance c/d	10,000
	1,10,000		1,10,000

1. **Totals method:** According to the Totals method, the total of debit and credit sides of an account is shown in the debit and credit columns of the Trial Balance. If the total of the debit column and the total of credit column of Trial Balance are equal, then the Trial Balance is said to agree, otherwise not.

For example, in the above example, the total of the debit side of Mr. A Account, i.e., Rs 1,10,000 is shown in the debit column of the Trial Balance and the total of the credit side of Mr. A Account, i.e., Rs 1,10,000 is shown in the credit column of the Trial Balance. The total of debit column and the total of the credit column of the Trial Balance are equal to each other.

Trial Balance as on April 30, 2011

Accounts	L.F.	Debit Total	Credit Total
		Rs	Rs
Mr. A's Account		1,10,000	1,00,000

3. **Balance method:** According to the Balance method, the balance of ledger accounts is shown in the debit and credit column of the Trial Balance. The balance of ledger may be either debit balance or credit balance. In the former case, the debit side of an account exceeds its credit side; whereas, in the latter case the credit side exceeds the debit side of the account. The sum total of the balances in the debit column of the Trial Balance must be equal to the sum total of the balances in the credit columns of the Trial Balance. It is a commonly used method.
4. For example, Mr A's account shows a debit balance of Rs 10,000, as the total of the debit side (Rs 1,10,000) exceeds the total of the credit side (Rs 1,00,000). The debit balance of Rs 10,000 will be shown in the debit column of the Trial Balance.

Trial Balance as on April 30, 2011

Accounts	L.F.	Debit	Credit
		Balance	Balance
		Rs	Rs
Mr. A's Account		10,000	

5. **Total cum balance method:** It is a combination of both of the above methods, i.e., Totals method and Balance method.

Trial Balance as on April 30, 2011

Accounts	L.F.	Debit	Credit	Debit	Credit
		Total	Total	Balance	Balance
		Total Rs	Rs	Rs	Rs
Mr. A's Account		1,10,000	1,00,000	10,000	

Question:5

What are the steps taken by an accountant to locate the errors in the trial balance?

Solution:

The following are various steps that an accountant takes to locate the errors in the Trial Balance.

1. Re-totalling of the debit and the credit columns of the Trial Balance to locate the difference in the total of both the columns.
2. Checking whether any account is omitted to be recorded with the exact difference amount.
3. Half the difference, then check whether any amount is posted in the wrong column of the Trial Balance.
4. Divide the difference by 9, if it is completely divisible, it is an error of transposition of figure, i.e. 546 is written as 645.

5. If there exist differences especially of Rs 1, Rs 10, Rs 100, Rs 1000, etc., it suggests that the casting of Subsidiary Books should be checked once again.
6. If difference still exists and it is **not** possible to detect the reason for the difference, then for the time being, the difference is transferred in the suspense account in order to proceed further. Otherwise, a complete checking is suggested.

Question:6

What is a suspense account? Is it necessary that suspense account will balance off after rectification of the errors detected by the accountant? If not, then what happens to the balance still remaining in suspense account?

Solution:

When Trial Balance does **not** agree, i.e., when the total of the debit column does **not** match that of the credit column, then the difference of the Trial Balance is transferred to a temporary account in order to avoid delay in preparation of the financial statements. This temporary account is termed as Suspense Account. If the debit column falls short of the credit column, then the Suspense Account is debited and if the credit column falls short of the debit column then the Suspense Account is credited.

If all the errors are detected and rectified, then the Suspense Account automatically gets closed (i.e. becomes zero). However, if still there exists any difference, then it should be transferred to the Balance Sheet. If the Suspense Account shows a debit balance, then it is shown in the Assets side and if the Suspense Account shows a credit balance, then it is shown in the Liabilities side of the Balance Sheet.

Question:7

What kinds of errors would cause difference in the trial balance? Also list examples that would not be revealed by a trial balance?

Solution:

The errors that lead to the differences in the Trial Balance are termed as one-sided errors. These are those errors that affect only one account. Below are given the errors that cause differences in the Trial Balance.

1. Wrong casting of any account, this is termed as the error of casting.
2. Wrong carrying forward of the balances from previous year's books or from one end of page to another. These types of errors are termed as the errors in carrying forward.
3. If entries are posted in the wrong side of accounts.
4. Posting of a wrong amount in account, this is termed as the error of posting.
5. If entries are recorded partially, i.e., the entries are **not** recorded completely, then due to the error of partial omission, Trial Balance does **not** agree.

Here are a few examples that would not be revealed in a Trial Balance:

1. Sales to Mr. X, omitted to be recorded in the Sales Day Book
2. Purchases made from Mukesh, recorded in Mahesh's Account, who is an other creditor
3. Wages paid for construction of building, recorded in the Wages Account

Question:8

State the limitations of trial balance?

Solution:

If the Trial Balance agrees, then it should not be taken for granted, that there is absolutely no errors. In fact, there do

exist some errors that are **not** revealed by a Trial Balance. Such ineffectiveness of the Trial Balance is termed as the limitations of Trial Balance. The various limitations of the Trial Balance are given below.

1. It does **not** assist to detect errors that arise if an entry is **not** recorded in the Journal. Such errors are termed as the Errors of Complete Omission.
2. If the effect of one error is cancelled by the effect of another error, then it **cannot** be ascertained by the Trial Balance. Such types of errors are termed as Compensatory Errors, which are rare to find.
3. If correct amount is posted in the correct side; however, in the wrong account and if wrong amount is posted in the wrong side, but in the correct account, then the Trial Balance fails to reflect these errors.
4. If there arises any error of principle, like capital expenditure mistakenly regarded as revenue expenditure or vice-versa, then such errors may **not** be revealed in form of mismatch between the two columns of the Trial Balance.
5. If any transaction is recorded wrongly in the books of original entry, then such mistakes lead to the errors of recording which are **not** revealed by Trial Balance.

Question:9

Describe the purpose for the preparation of trial balance.

Solution:

The important purposes for the preparation of Trial Balance are explained with the help of the following points.

1. **Ascertaining the arithmetical accuracy**– When the total of all debit balance accounts are equal to all credit balance accounts, it is assumed that at least posting from journal to the respective accounts is arithmetically correct.
2. **Summarising the ledger accounts**– Trial Balance acts as a consolidated statement, providing a comprehensive list of all the accounts. Thus, a Trial Balance provides a summarised version of each account.
3. **Preparing final accounts**– As the Trial Balance provides a summarised version of each account, so different accounts can be directly transferred to Trading, Profit and Loss Account, and Balance Sheet without referring to different ledgers.
4. **Locating and rectifying errors**– If the Trial Balance does **not** agree, it indicates the occurrence of arithmetical error, which can be easily located. However, Trial Balance only helps in locate and rectify arithmetical error and **not** other types of errors.

Question:10

Explain errors of principle and give two examples with measures to rectify them.

Solution:

Errors of Principle refer to those errors that are committed when recording of transactions in the original book of entry is done against the accounting principle. These errors are **not** reflected in the Trial Balance. These errors are committed when proper distinction is **not** made between capital expenditure and revenue expenditure, or vice versa or between capital income and revenue income or vice versa.

The following examples will illustrate the process of understanding and rectification of such errors.

Let us consider first example. Wages paid for construction of building are debited to Wages Account.

Wrong entry made is:

Wages A/c

To Cash A/c

(Wages paid in cash)

In this case, Wages paid for the construction of building should be treated as a capital expenditure and accordingly should be debited to the building account. However, the Wages Account is wrongly debited. Thus, the correct entry that should have been made is:

Building A/c Dr.

To Cash A/c

(Wages paid for construction of building)

In order to rectify this error, the rectifying entry should be:

Building A/c Dr.

To Wages A/c

(Wages paid for construction
of building was debited to Wages Account, now rectified)

The second example of errors of principle is the sale of old machinery recorded as sales.

Wrong entry made:

Cash A/c Dr.

To Sales A/c

(Sales of old machinery, recorded as sales)

In this case, the sale of old machinery should **not** be recorded as sales; in fact the Machinery Account should be credited. Thus, the correct entry that should have been made is:

Cash A/c Dr.

To Machinery A/c

(Old machinery sold for cash)

In order to rectify this error, Sales Account will be debited, as it is wrongly credited and machinery will be credited, as it will **not** be recorded in the books. Thus, the rectifying entry will be:

Sales A/c	Dr.
-----------	-----

To Machinery A/c

(Sale of old machinery recorded as sales, now rectified)

Question:11

Explain the errors of commission and give two examples with measures to rectify them.

Solution:

Errors of commission refer to those errors that are committed when transactions are recorded with wrong amounts, wrong balancing is done, wrong posting and/or wrong carrying forwarded is done. The following examples will illustrate the process of understanding and rectification of such errors.

1. Let us consider the first example. Sales made to Mr. X of Rs 10,000 recorded as 1,000 from invoice.

In this case, Mr. X's account has been debited with Rs 1,000 instead of Rs 10,000; hence, the error of commission is committed. This requires a further debit of Rs 9,000, in order to rectify this error of commission. This will be rectified by passing the following entry:

Mr X's A/c	Dr.	9,000
To Sales A/c		9,000

(Goods sold to Mr X of Rs 10,000 was wrongly posted as Rs 1,000, now rectified)

2. Purchase book was undercast by Rs 10,000.

This error can be rectified in any of the following two stages:

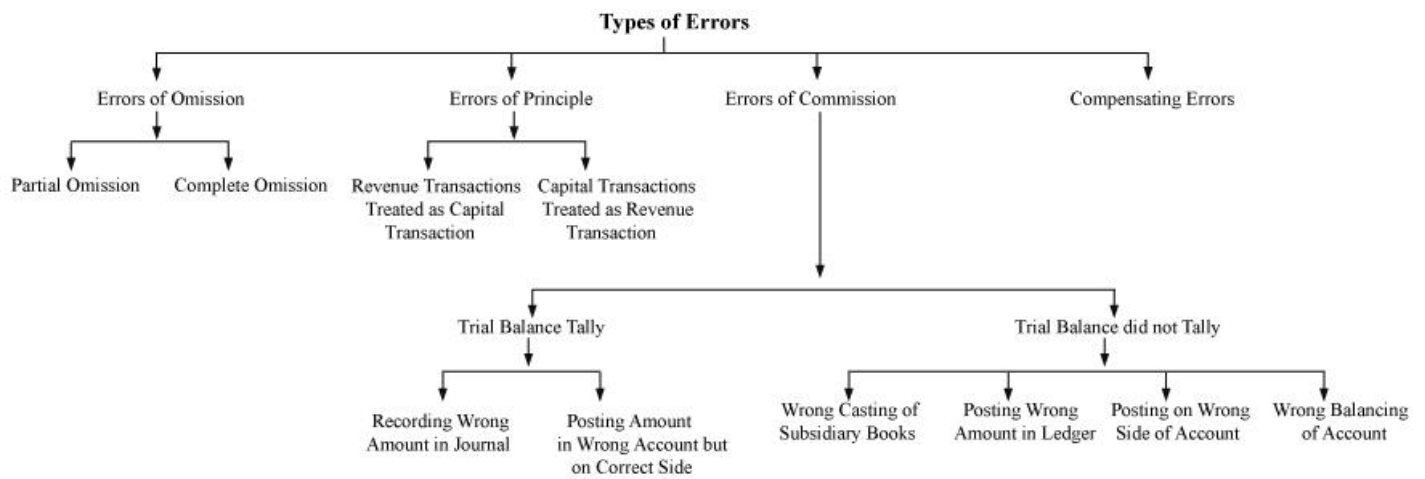

- a. If an error is located before preparing trial balance, then Rs 10,000 should be recorded in the debit side of Purchases Account.
- b. If an error is located after preparing Trial Balance, then the following entry need to be recorded.

Purchase A/c	Dr. 10,000
To Suspense A/c	10,000

Question:12

What are the different types of errors that are usually committed in recording business transaction?

Solution:

1. **Errors of omission**– When an entry gets omitted during recording in the book of original entry or during posting the transaction, then error of omission is committed. There are two types of errors of omission, viz.:
1. **Partial omission**– When a transaction is correctly recorded in one side of account but is **not** recorded in the other side of the account. For example, goods sold to Mahesh recorded in sales but omitted to be recorded in Mahesh's account. It affects the trial balance.
2. **Complete omission**– When a transaction gets completely omitted to be recorded in the books, then it is the case of complete omission . For example, transaction related to purchase of goods from Rakesh is not recorded in the purchases book. Such omissions does **not** affect the trial balance.
2. **Errors of principle**– These refer to those errors that are committed when recording of transactions in the book of the original entry is done against the accounting principle. These errors affect the trial balance.
3. These errors are committed when proper distinction is **not** made between revenue income or expenditure and capital income or expenditure. These are of two types:

When revenue transactions are treated as capital transactions
When capital transactions are treated as revenue transactions.
For example, repairs made to machinery, recorded in machinery account.

4. **Errors of commission**– These refer to those errors that are committed when transactions are recorded with wrong amounts, wrong balancing, wrong posting and/or wrong carrying forwarded is done.
5. These are of two types:
 1. **Trial balance does not agree**

When trial balance does not agree, then there exist one-sided errors that affect only one account and thereby are easily detectable. These one-sided errors exist due to the following reasons:

- i. Wrong casting of subsidiary book
Posting wrong amount in ledger
Posting on the wrong side of account
Wrong balancing of account

2. Trial balance agrees

- i. When the trial balance agrees, then it should **not** be taken for granted that there are no errors, as the tallied trial balance just ensures the absence of arithmetical errors. These errors are **not** easily detectable; as these do **not** affect the trial balance. These errors arise due to: Recording wrong amount in the original book
- ii. Posting amount in the wrong account but in the correct side

6. **Compensating errors**– When effects of one error are cancelled by the effects of another error of an equal amount, then compensating errors are committed. For example, Mr. A's account was credited by Rs 2,000 instead of 200 and Mr. B's account was credited by Rs 200 instead of 2,000. In this case, the error in Mr. A's account will be compensated by the error in Mr. B's account.

As an accountant of a company, you are disappointed to learn that the totals in your new trial balance are not equal. After going through a careful analysis, you have discovered only one error. Specifically, the balance of the Office Equipment account has a debit balance of Rs. 15,600 on the trial balance. However, you have figured out that a correctly recorded credit purchase of pen-drive for Rs 3,500 was posted from the journal to the ledger with a Rs. 3,500 debit to Office Equipment and another Rs. 3,500 debit to creditors accounts. Answer each of the following questions and present the amount of any misstatement :

- Is the balance of the office equipment account overstated, understated, or correctly stated in the trial balance?
- Is the balance of the creditors account overstated, understated, or correctly stated in the trial balance?
- Is the debit column total of the trial balance overstated, understated, or correctly stated?
- Is the credit column total of the trial balance overstated, understated, or correctly stated?
- If the debit column total of the trial balance is Rs. 2,40,000 before correcting the error, what is the total of credit column.

Solution:

According to the given information, trial balance does **not** agree. Pen-drive is wrongly debited to office equipment account, instead of stationery account and supplier account is debited instead of crediting. Due to these mistakes, the following errors are committed:

- The balance of office equipment is overstated by Rs 3,500.
- The balance of creditors account is understated by Rs 7,000.
- The total of the debit column of the trial balance is correctly stated.
- The total of the credit column of the trial balance is understated by Rs 7,000.
- If the total of the debit column of the trial balance is Rs 2,40,000 before rectifying error, the total of the credit column of the trial balance is Rs 2,33,000 (i.e., Rs 2,40,000 – Rs 7,000).

Question:14

Rectify the following errors:

- Credit sales to Mohan Rs 7,000 were not recorded.
- Credit purchases from Rohan Rs 9,000 were not recorded.
- Goods returned to Rakesh Rs 4,000 were not recorded.
- Goods returned from Mahesh Rs 1,000 were not recorded.

Solution:

Journal

S.No.	Particulars	L.F.	Debit Amount Rs	Credit Amount Rs
(i)	Mohan Dr. To Sales A/c (Goods sold to Mohan were not recorded, now recorded)		7,000	7,000
(ii)	Purchases A/c Dr. To Rohan (Goods purchased to Rohan were not recorded, now recorded)		9,000	9,000

(iii)	Rakesh To Purchases Return A/c (Goods returned to Rakesh were not recorded, now recorded)	Dr.	4,000	4,000
(iv)	Sales Return A/c To Mahesh (Goods returned from Mahesh were not recorded, now recorded)	Dr.	1,000	1,000

Question:15

Rectify the following errors:

- Credit sales to Mohan Rs 7,000 were recorded as Rs 700.
- Credit purchases from Rohan Rs 9,000 were recorded. as Rs 900.
- Goods returned to Rakesh Rs 4,000 were recorded as Rs 400.
- Goods returned from Mahesh Rs 1,000 were recorded as Rs 100.

Solution:

Journal

S.No.	Particulars	L.F.	Debit Amount Rs	Credit Amount Rs
(i)	Mohan To Sales A/c (Goods sold to Mohan Rs 7,000 were recorded as Rs 700, now rectified)	Dr.	6,300	6,300
(ii)	Purchases A/c To Rohan (Goods purchased from Rohan Rs 9,000 were recorded as Rs 900, now rectified)	Dr.	8,100	8,100
(iii)	Rakesh To Purchases Return A/c (Goods returned to Rakesh Rs 4,000 were recorded as Rs 400, now rectified)	Dr.	3,600	3,600
(iv)	Sales Return A/c To Mahesh (Goods returned from Mahesh Rs 1,000 were not recorded as Rs 100, now rectified)	Dr.	900	900

Question:16

Rectify the following errors:

- (i) Credit sales to Mohan Rs 7,000 were recorded as Rs 7,200.
- (ii) Credit purchases from Rohan Rs 9,000 were recorded as Rs 9,900.
- (iii) Goods returned to Rakesh Rs 4,000 were recorded as Rs 4,040.
- (iv) Goods returned from Mahesh Rs 1,000 were recorded as Rs 1,600.

Solution:

Journal

S. No.	Particulars	L.F.	Debit Amount Rs	Credit Amount Rs
(i)	Sales A/c To Mohan (Goods sold to Mohan Rs 7,000 were recorded as Rs 7,200, now rectified)	Dr.	200	200

(iv)	Mahesh To Sales Return A/c (Goods returned from Mahesh Rs 1,000 were recorded as Rs 1,600, now rectified)	Dr.	600	600

Question:17

Rectify the following errors:

- (a) Salary paid Rs 5,000 was debited to employee's personal account.
- (b) Rent Paid Rs 4,000 was posted to landlord's personal account.
- (c) Goods withdrawn by proprietor for personal use Rs 1,000 were debited to sundry expenses account.
- (d) Cash received from Kohli Rs 2,000 was posted to Kapur's account.
- (e) Cash paid to Babu Rs 1,500 was posted to Sabu's account.

Solution:

(c)	Return Inwards A/c To Suspense A/c (Return Inwards Book undercast by Rs 200, now rectified)	Dr.	200	200
(d)	Suspense A/c To Return Outwards A/c (Return Outwards Book undercast by Rs 100, now rectified)	Dr.	100	100

Question:21

Rectify the following errors and ascertain the amount of difference in trial balance by preparing suspense account:

- Credit sales to Mohan Rs 7,000 were not posted.
- Credit purchases from Rohan Rs 9,000 were not posted.
- Goods returned to Rakesh Rs 4,000 were not posted.
- Goods returned from Mahesh Rs 1,000 were not posted.
- Cash paid to Ganesh Rs 3,000 was not posted.
- Cash sales Rs 2,000 were not posted.

Solution:

S. No.	Particulars	L.F.	Debit Amount Rs	Credit Amount Rs
(a)	Mohan To Suspense A/c (Goods sold on credit to Mohan were not posted in Mohan's Account, now rectified)	Dr.	7,000	7,000

	Balance c/d		2,000				
			14,000				14,000

Note: In order to match the balance of suspense account, it has been assumed that all errors given in the question are errors of partial omission.

Question:22

Rectify the following errors and ascertain the amount of difference in trial balance by preparing suspense account:

- Credit sales to Mohan Rs 7,000 were posted as Rs 9,000.
- Credit purchases from Rohan Rs 9,000 were posted as Rs 6,000.
- Goods returned to Rakesh Rs 4,000 were posted as Rs 5,000.
- Goods returned from Mahesh Rs 1,000 were posted as Rs 3,000.
- Cash sales Rs 2,000 were posted as Rs 200.

Solution:

S. No.	Particulars	L.F.	Debit Amount Rs	Credit Amount Rs
(a)	Suspense A/c Dr. To Mohan (Sold goods to Mohan Rs 7,000 wrongly posted as Rs 9,000, now rectified)		2,000	2,000

Note: As per the solution, suspense account shows the credit balance of Rs 6,000. However, in the book the answer is credit balance of Rs 1,000. So, in order to match the answer with the book item (d) is taken as, 'Cash Sales to Rana Rs 5,000 were not posted to the sales account.' Thus, the rectifying entry of this error will be:

Suspense A/c	Dr. 5,000	
To Sales A/c		5,000

Question:34

Trial balance of Madan did not agree and he put the difference to suspense account. He discovered the following errors:

- Sales return book overcast by Rs 800.
- Purchases return to Sahu Rs 2,000 were not posted.
- Goods purchased on credit from Narula Rs 4,000 though taken into stock, but no entry was passed in the books.
- Installation charges on new machinery purchased Rs 500 were debited to sundry expenses account as Rs 50.
- Rent paid for residential accommodation of madam (the proprietor) Rs 1,400 was debited to Rent account as Rs 1,000.

Rectify the errors and prepare suspense account to ascertain the difference in trial balance.

Solution:**Journal**

Note: As per the solution Suspense Account shows a credit balance of Rs 50. However, as per the answer given in the book, it is a credit balance of Rs 2050. In order to match answer with the book item (b) is taken as, 'Purchases return to Sahu Rs 2,000 were not posted to Sahu's Account.' Thus, the rectifying entry for this error will be as:

Sahu's A/c	Dr.	2,000
