Senior Secondary School Term II Examination, 2022
Marking Scheme – ECONOMICS (SUBJECT CODE – 030)
(PAPER CODE – 58/5/1)

General Instructions: -

1. You are aware that evaluation is the most important process in the actual and correct assessment of the candidates. A small mistake in evaluation may lead to serious problems which may affect the future of the candidates, education system and teaching profession. To avoid mistakes, it is requested that before starting evaluation, you must read and understand the spot evaluation guidelines carefully.
2. **“Evaluation policy is a confidential policy as it is related to the confidentiality of the examinations conducted, Evaluation done and several other aspects. Its’ leakage to public in any manner could lead to derailment of the examination system and affect the life and future of millions of candidates. Sharing this policy/document to anyone, publishing in any magazine and printing in News Paper/Website etc may invite action under IPC.”**
3. Evaluation is to be done as per instructions provided in the Marking Scheme. It should not be done according to one’s own interpretation or any other consideration. Marking Scheme should be strictly adhered to and religiously followed. **However, while evaluating, answers which are based on latest information or knowledge and/or are innovative, they may be assessed for their correctness otherwise and marks be awarded to them. In class-XII, while evaluating two competency based questions, please try to understand given answer and even if reply is not from marking scheme but correct competency is enumerated by the candidate, marks should be awarded.**
4. The Head-Examiner must go through the first five answer books evaluated by each evaluator on the first day, to ensure that evaluation has been carried out as per the instructions given in the Marking Scheme. The remaining answer books meant for evaluation shall be given only after ensuring that there is no significant variation in the marking of individual evaluators.
5. Evaluators will mark (√) wherever answer is correct. For wrong answer ‘X’ be marked. Evaluators will not put right kind of mark while evaluating which gives an impression that answer is correct and no marks are awarded. **This is most common mistake which evaluators are committing.**
6. If a question has parts, please award marks on the right-hand side for each part. Marks awarded for different parts of the question should then be totalled up and written in the left-hand margin and encircled. This may be followed strictly.
7. If a question does not have any parts, marks must be awarded in the left-hand margin and encircled. This may also be followed strictly.
8. If a student has attempted an extra question, answer of the question deserving more marks should be retained and the other answer scored out.
9. No marks to be deducted for the cumulative effect of an error. It should be penalized only once.

10. A full scale of marks 40 (example 0-40 marks as given in Question Paper) has to be used. Please do not hesitate to award full marks if the answer deserves it.
11. Every examiner has to necessarily do evaluation work for full working hours i.e., 8 hours every day and evaluate 30 answer books per day in main subjects and 35 answer books per day in other subjects (Details are given in Spot Guidelines). This is in view of the reduced syllabus and number of questions in question paper.
12. Ensure that you do not make the following common types of errors committed by the Examiner in the past: -
 - Leaving answer or part thereof unassessed in an answer book.
 - Giving more marks for an answer than assigned to it.
 - Wrong totalling of marks awarded on a reply.
 - Wrong transfer of marks from the inside pages of the answer book to the title page.
 - Wrong question wise totalling on the title page.
 - Wrong totalling of marks of the two columns on the title page.
 - Wrong grand total.
 - Marks in words and figures not tallying.
 - Wrong transfer of marks from the answer book to online award list.
 - Answers marked as correct, but marks not awarded. (Ensure that the right tick mark is correctly and clearly indicated. It should merely be a line. Same is with the X for incorrect answer.)
 - Half or a part of answer marked correct and the rest as wrong, but no marks awarded.
13. While evaluating the answer books if the answer is found to be totally incorrect, it should be marked as cross (X) and awarded zero (0) Marks.
14. Any unassessed portion, non-carrying over of marks to the title page, or totalling error detected by the candidate shall damage the prestige of all the personnel engaged in the evaluation work as also of the Board. Hence, in order to uphold the prestige of all concerned, it is again reiterated that the instructions be followed meticulously and judiciously.
15. The Examiners should acquaint themselves with the guidelines given in the Guidelines for spot Evaluation before starting the actual evaluation.
16. Every Examiner shall also ensure that all the answers are evaluated, marks carried over to the title page, correctly totalled and written in figures and words.
17. The Board permits candidates to obtain photocopy of the Answer Book on request in an RTI application and also separately as a part of the re-evaluation process on payment of the processing charges.

Senior Secondary School Examination TERM-II, 2022

[Paper Code : 58/5/1]

[illegible]

| | <p>We know that at equilibrium level, $Y = C + I$; $Y = \bar{c} + MPC(Y) + \bar{I}$ $4,400 = 1,000 + MPC(4,400) + 70$ $MPC = 0.76$ $MPS = 1 - 0.76 = 0.24$ (MPS = 1 - MPC) (any other valid calculation i.e., through saving function may also be awarded marks.)</p> | <p>½ ½ ½ ½</p> | | | | | | | | | | | | | | | |
|------------------|--|----------------------------|-----------|---------|----------------|------|------|------------------|------|------|-----------------|------|------|-------|-----|-----|----------------|
| | 2 | | | | | | | | | | | | | | | | |
| 3. | <p>‘Consumption function curve of an involuntary unemployed worker starts from some positive level on Y-axis at zero level of income.’ Justify the given statement. Consumption function curve of an unemployed person starts from some positive level on Y-axis, as Autonomous Consumption is independent of level of income. Autonomous Consumption signifies the minimum level of consumption which is essential for survival. (to be marked as a whole)</p> | 2 | | | | | | | | | | | | | | | |
| 4. | <p>‘Health is a yardstick of human well-being.’ Justify the given statement with valid explanation. Health is a state of complete physical, mental and social well-being. It is not merely the absence of disease. It also implies the ability to realize one’s potential. It is a holistic process related to overall growth and development of the nation. Thus, it can be said that health is a yardstick of human well-being. (to be marked as a whole)</p> | 2 | | | | | | | | | | | | | | | |
| 5. | <p>Compare and analyse the sector-wise trends in employment, based on following information:</p> <p style="text-align: center;">Trends in Employment (Sector-wise)</p> <table border="1"> <thead> <tr> <th>Sector</th><th>1999-2000</th><th>2011-12</th></tr> </thead> <tbody> <tr> <td>Primary Sector</td><td>60.4</td><td>48.9</td></tr> <tr> <td>Secondary Sector</td><td>15.8</td><td>24.3</td></tr> <tr> <td>Tertiary Sector</td><td>23.8</td><td>26.8</td></tr> <tr> <td>Total</td><td>100</td><td>100</td></tr> </tbody> </table> <p>The given schedule represents that:</p> <ul style="list-style-type: none"> • The workforce engaged in primary sector has declined from 60% (1999–2000) to 49% (2011–12). It may be due to greater number of job opportunities available in the other two sectors. • Secondary sector and Tertiary sector exhibit increase from 16% to 24% and from 24% to 27%, respectively. It may be because of rapid industrialisation and improvement of infrastructural facilities. <p style="text-align: center;">OR</p> <p>(b) Ram is an owner of a salon. He is temporarily absent from work due to injury. Can he be considered as a worker? Explain. Ram is a self-employed worker. Since he is involved in productive activity he would be considered as a worker in spite of his temporary absence from the work. (to be marked as a whole)</p> | Sector | 1999-2000 | 2011-12 | Primary Sector | 60.4 | 48.9 | Secondary Sector | 15.8 | 24.3 | Tertiary Sector | 23.8 | 26.8 | Total | 100 | 100 | <p>1 1</p> |
| Sector | 1999-2000 | 2011-12 | | | | | | | | | | | | | | | |
| Primary Sector | 60.4 | 48.9 | | | | | | | | | | | | | | | |
| Secondary Sector | 15.8 | 24.3 | | | | | | | | | | | | | | | |
| Tertiary Sector | 23.8 | 26.8 | | | | | | | | | | | | | | | |
| Total | 100 | 100 | | | | | | | | | | | | | | | |
| | 2 | | | | | | | | | | | | | | | | |
| 6. | <p>Giving valid reasons, explain how the following would be treated while estimating domestic income?</p> <p>(i) Payment made by a Japanese tourist for goods purchased in India. (ii) Broker’s commission on the sale of second-hand goods.</p> <p>(i) It will be included in domestic income as goods purchased by Japanese tourist is the expenditure made by him in India. It will be considered as exports.</p> | 1½ | | | | | | | | | | | | | | | |

| | | |
|-----|--|------------------|
| (b) | (ii) It will be included in domestic income because it is the income received by the broker in return for providing his factor services. | 1½ |
| | OR | 3 |
| | “Gross Domestic Product (GDP) as an indicator of welfare loses its significance if the distribution of income turns unequal.” Justify the given statement with valid reason. A rise in Gross Domestic Product (GDP) may not benefit all the sections of the society in the same dimension. This is because a given rise in GDP may be concentrated in the hands of very few individuals or firms. For the rest, the income may not vary or may have fallen. In such a case, the welfare of the entire country may not increase despite the increase in GDP. (to be marked as a whole) | 3 |
| 7. | Women’s health in India has become a matter of great concern.’ Defend or refute the given statement with valid argument. The given statement is defended. Women health across the country has been a matter of great concern because of: (i) Increasing case of female foeticide and maternal mortality (ii) About 3 lakhs girls below 15 years of age are not only married but have already borne children at least once (iii) More than 50% of married women between the age group of 15–49 years have anaemia (any other valid reason to be allotted marks) | 1 1 1 3 |
| 8. | “The Government has raised the exemption limit for the payment of Income tax from ₹2 lakh to ₹2.5 lakh.” If the situation of deficient demand is prevailing in the economy, what will be the impact of this action taken by the Government? In the given situation of deficient demand, an increase in the exemption limit by the Government would lead to decrease in the tax burden on the households, resulting an increase in disposable income. Thus, Aggregate Demand (AD) will increase and deficient demand will be managed accordingly. (to be marked as a whole) | 3 |
| 9. | Define ‘liberty indicator’ with the help of an example and state its importance. Liberty indicator may be defined as the measure of the extent of demographic participation in the social and political decision making. For example: Measure of the extent of the constitutional protection rights, given to citizens. It is important to include the liberty indicators. Without these the construction of a human development index may be said to be incomplete. (any other valid example/explanation to be allotted marks) | 3 |
| 10. | Briefly explain any two similar developmental strategies opted by India and Pakistan for their respective developmental path. Two similar developmental strategies opted by India and Pakistan for their respective development are: (i) Both of them have followed the path of mixed economic structure involving the participation of both public as well as the private sector. (ii) Both India and Pakistan introduced import substitution policy in order to protect the domestic industries from foreign competition (any other valid strategy to be allotted marks) | 1 ½ 1 ½ 3 |

| 11. | <p>‘Investment multiplier and Marginal Propensity to Consume are directly related to each other.’ Explain with the help of numerical example.</p> <p>Investment multiplier (K) and Marginal Propensity to Consume (MPC) are directly related. Now, suppose the value of MPC = 0.6</p> <p>Then, the value of $K = \frac{1}{1 - MPC}$ $= \frac{1}{1 - 0.6} = \frac{1}{0.4} = 2.5$</p> <p>If the value of MPC changes from 0.6 to 0.8 then, the value of $K = \frac{1}{1 - 0.8} = \frac{1}{0.2} = 5$</p> <p>Thus, it is clear from illustration mentioned above that there exists direct relation between MPC and investment multiplier. As MPC increases the value of investment multiplier also increases. (any other valid point/reason/argument/example should be awarded marks accordingly)</p> | <p>1</p> <p>1 ½</p> <p>1 ½</p> <p>1</p> <p>5</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|--------|--|--|-------|---------------------|-----|---------|---|------|------|----|-------|----------|----|------|-------------------------------------|-----|-----|--------|----|------|-----------|----|--------|-------|---------------------|-----|-----------------|-------|------|----------------------------|--------|-------|--------------------------------------|--------|------|---|-------|-----|--|-------|------|---|--------|---|
| 12. | <p>From the following data, calculate the value of operating surplus:</p> <table border="1" data-bbox="288 891 1204 1196"> <thead> <tr> <th>S. No.</th><th>Items</th><th>Amount in (₹ crore)</th></tr> </thead> <tbody> <tr> <td>(i)</td><td>Royalty</td><td>5</td></tr> <tr> <td>(ii)</td><td>Rent</td><td>75</td></tr> <tr> <td>(iii)</td><td>Interest</td><td>30</td></tr> <tr> <td>(iv)</td><td>Net domestic product at factor cost</td><td>400</td></tr> <tr> <td>(v)</td><td>Profit</td><td>45</td></tr> <tr> <td>(vi)</td><td>Dividends</td><td>20</td></tr> </tbody> </table> <p>Operating Surplus = (i) + (ii) + (iii) + (v) = 5 + 75 + 30 + 45 = ₹ 155 crore</p> <p>Distinguish between ‘Fixed investment’ and ‘Inventory Investment’</p> <p>Fixed investment refers to addition to the stock of fixed assets in the hands of producers during an accounting year. Whereas, inventory investment is addition to the stock of inventory (unsold finished goods, semi-finished goods, raw material) with the producers during an accounting year.</p> <p style="text-align: center;">OR</p> <p>From the following data, calculate the value of Compensation of Employees (COE):</p> <table border="1" data-bbox="288 1637 1337 1942"> <thead> <tr> <th>S. No.</th><th>Items</th><th>Amount in (₹ crore)</th></tr> </thead> <tbody> <tr> <td>(i)</td><td>Old age pension</td><td>2,000</td></tr> <tr> <td>(ii)</td><td>Wages and salaries in cash</td><td>60,000</td></tr> <tr> <td>(iii)</td><td>Rent free accommodation to employees</td><td>30,000</td></tr> <tr> <td>(iv)</td><td>Employer’s contribution to provident fund</td><td>7,500</td></tr> <tr> <td>(v)</td><td>Payment of life insurance premium by the employees</td><td>2,500</td></tr> <tr> <td>(vi)</td><td>Contribution to provident fund by employees</td><td>35,000</td></tr> </tbody> </table> <p>Compensation of Employees (COE) = (ii) + (iii) + (iv) = 60,000 + 30,000 + 7,500 = ₹ 97,500 crore</p> | S. No. | Items | Amount in (₹ crore) | (i) | Royalty | 5 | (ii) | Rent | 75 | (iii) | Interest | 30 | (iv) | Net domestic product at factor cost | 400 | (v) | Profit | 45 | (vi) | Dividends | 20 | S.
